Hot water & milk heaters

The taste of quality worldwide

Bravor Bonamat offers a wide range of high quality hot water and milk equipment. The HW-series heats large quantities of water quickly at the right temperature, perfect for preparing a cup of tea, soup or other hot drinks. The HM-series is developed for heating milk and includes the HCM, a machine designed specifically for heating chocolate milk. Both series heat the beverage by the bain-marie method, preventing burning or sticking. The containers can be placed in any location so hot drinks can be served wherever there is a demand.

Quick and easy:
drawing off with the handy non-drip tap.

Hot water machines highlighted

- Large quantities of hot water quickly
- Hot water dispensers and double walled containers
- Easy operation and maintenance
- Compact stainless steel appearance
- Containers have an adjustable thermostat equipped with indicator lamp
- Boil dry safety mechanism
- Available with and without water connection

(Chocolate) milk heaters highlighted

- Large quantities of hot (chocolate) milk quickly
- Double walled containers
- Hot water reservoir for an even distribution of heat
- Hygienic: flush inside kettle and easy to clean parts
- Easy operation
- Robust stainless steel appearance
- Adjustable thermostat equipped with indicator lamp
- Bain-marie heating method prevents burning or sticking
- Handy stirring/measuring stick (HM) and special stirring device (HCM)

Models

The HW-series consists of hot water dispensers and containers designed for sites with and without water connection. The dispensers are extremely suitable to place on a buffet. The containers (4, 8 and 16 litres) can be transported easily so you can serve hot water anywhere you like. Beautifully designed hot water dispensers can also be found in the RLX-series: the RLX 3 and RLX 4. The (chocolate) milk heaters of the H(C)M-series heat the beverage using the 'bain-marie' method. The HM-series are available in 5, 10 and 20 litres and the HCM in 10 litres.

It is also possible to place the modern designed hot water dispenser RLX 3 or hot water/steam dispenser RLX 4 as a separate as well as in combination with your existing equipment.

HW-series H(C)M-series

The required temperature is indicated by means of a digital display and a lamp indicates when the water in the container is at the right temperature.

HW-series
