

# MOCCAKING

**TECHNI  
VORM**

## CLUBLINE MOCCAING

A special design for pubs, clubs and restaurants.

- \* Non scratch wipe down finish with aluminium construction available in chromium, silver, gold or white with brown or black trimmings.
- \* Two easy-to-clean 3 pint jugs with wide necks and removable lids, so designed that the coffee goes straight to the bottom of the jug eliminating the need to stir before serving.
- \* Reservoir measuring gauge on both sides of the machine. Marks correspond with those on the jugs.
- \* A special cut-out device which stops the flow of coffee if either the jug or filter is removed during the brew cycle and switches on again automatically when jug or filter is replaced.
- \* Automatic booster for bottom hotplate from the moment the unit is switched on, which automatically reduces to the correct keeping temperature when the jug is full.
- \* Facility to hold both 'V' shaped and fluted filter papers. The use of 'V' filters is recommended for smaller quantities of coffee.
- \* 5 minute brew time.
- \* Automatic descaling with illuminated warning light.

Original "Smitdesign", hand-built by Technivorm of Amerongen, The Netherlands.

Technical data:

- illuminated on/off switches  
brewing indication lamp
- water-heating element 230 Volts 2200 Watts
