Niagara IN

Under Counter Water Chiller

The space-saving version!

The Niagara IN is ideal for making the most of limited spaces, since it can be installed under the counter or tucked away in a corner. High-technology solutions are leveraged to ensure that the water dispensed is always chilled, even when the connection to the mains supply is some distance away.

The entire range is available in a stainless-steel version that is highly suited to professional kitchens, clinics, hotels and anywhere else in which hygiene is of paramount importance.

More space: Only the tap is visible on your worktop!

Optional filters: Filters can easily be attached to improve the taste and aroma of the water dispensed.

Speed: Chilled still or sparkling water in an instant!

❖ Inside Niagara IN

Ice-bank cooling system

Eliminates the possibility of stagnation or contamination of the water.

Sparkling water

The silent, professional cold-carbonation system provides large quantities of sparkling water.

❖ Discover the Niagara range

The perfect cooler...whatever your needs!

Each version of the Niagara has been designed to cater to a specific set of criteria, including: performance, footprint and dimensions, available space and usage patterns.
