

# THERMOSERVE II X

## THERMOSERVE IIX

*The worlds most advanced Coffee Maker*

- \* No Hotplates - No stewing of your Coffee
- \* Vacuum Jugs - Keeps the Coffee hot for hours
- \* No Glass Liners - No breakages (strong stainless steel liners instead of glass and strong stainless steel mantle)
- \* Cut Out Device - Stops the flow of Coffee when Jug is removed and continues Brewing where it left off when Jug is replaced

No priming of the Boiler required. Allows you to let your customer do the installation, he can do nothing wrong!

New Thermostat/Fuse: You may never have to exchange a fuse again, plus the Coffee maker does not shut down when scaled up, but gives a couple of days "grace" before descaling

The spray coated body of the ThermoServe is scratch resistant and easy to maintain

The Thermoserve IIX is a product made of recyclable and non-toxic materials and adds to the protection of the environment in both product and productions methods and last but not least by its long-long life, and good aftersales service.
